

BRIO MULTI-STIM 4

4 CHANNEL UNIT FOR ELECTROTHERAPY

Multi-Stim 4 is a four channel electrotherapy device, that is optimized for pain relief and muscle stimulation application. All four channel intensity operates independently, this makes it possible to treat major muscle groups simultaneously or perform bilateral treatment at the same time. Perfectly suitable unit for Rehabilitation as well as sports.

When operated through protocols, depending on the selection, system will change sequential parameters to give optimize treatment. For e.g in muscle strengthening protocol, system will give warm up stimulations followed by Strengthening stimulation and end with cool down stimulations.

Output Channel :
Four (8 Electrodes)

Currents : IFCT (4 Pole, Vector 100%,
Vector 40%), 2 Pole, Russian, Tens,
NMES (In Protocols)

Clinical Library- 12 programs

Protocols- 26 programs

Graphic LCD

Wave Shape: Biphasic

Intensity : 0-99.9 mA in
4 channels individually
variable

STANDARD SCOPE OF SUPPLY :

- 28000 BRIO Multi-Stim 4 Channel Unit

ACCESSORIES

- 26128 Stim Lead Wire x 4
- 00991 Stim Rubber Electrode x 8
- 00989 Sticking Electrode pack of 4 x 1
- 00994 Elastic Strap x 4
- 09115 Mains Cable x 1
- 00988 Jelly Bottle x 1

OPTIONAL ACCESSORIES :

- 28105 BRIO stylish Sling bag
